

Clinical Informatics Fellowship at UCLA

The goal of the fellowship is to develop leaders with expertise in biomedical informatics and health information technology who are prepared to advance the science and practice of clinical informatics within health care delivery systems.

The fellowship will provide physicians with an experiential, two-year training program that follows the guidelines from the Accreditation Council for Graduate Medical Education (ACGME) for clinical informatics subspecialty training. The program's educational experiences include rotations in UCLA Health's Information Services and Solutions Department, didactic sessions, courses, an independent research project, and practice in the fellow's primary clinical specialty. Upon successfully completing the program, fellows will be eligible for board certification in clinical informatics.

UCLA Clinical Informatics Fellowship

Applications for July 2017 will be reviewed on a rolling basis until December 2016. Apply early to ensure full consideration.

Submit the online application and send supplemental materials to CIFellowship@mednet.ucla.edu

UCLA Clinical Informatics Fellowship

The David Geffen School of Medicine at UCLA and UCLA Health are seeking outstanding applicants for a two-year fellowship in Clinical Informatics (CI) at the University of California, Los Angeles. The program is open to graduates of residency programs in any specialty. One position will be available beginning July 2017.

The Discipline of Clinical Informatics

Clinical informatics is the scientific discipline focused on the effective use of biomedical information and knowledge in health care.

Physicians who practice in the new subspecialty of clinical informatics work to transform health care by analyzing, designing, implementing, and evaluating information and communication systems that enhance individual and population health outcomes, improve patient care, and strengthen the clinician-patient relationship. Clinical informatics is central to the delivery of safe, high-quality health care and to innovation in health care.

About UCLA Health

UCLA Health includes four hospitals and 200+ community offices throughout Southern California. UCLA's EHR is accessed by more than 20,000 users, including over 3,000 physicians.

Of our 20 Physician Informaticists who are all practicing physicians in various medical specialties, 12 are board-certified in Clinical Informatics.

UCLA Health has been recognized for its achievements in health informatics:

- Achieved Stage 7 designation in the inpatient setting by HIMSS Analytics within the first year of EHR deployment
- Successfully demonstrated Stage 1 Meaningful Use for both inpatient and outpatient EHR use within the first year of implementation
- Achieved Leapfrog Computerized Physician Order Entry (CPOE) certification
- Designated "Most Wired" by Hospitals & Health Networks
