

April 26, 2011

We are delighted to introduce CareConnect, UCLA's comprehensive electronic health record (EHR) program. It is based on one of the most highly rated EHR software systems in the nation, and will securely connect thousands of people across the UCLA Health System.

Your participation in making this Program a success is critical, as CareConnect will support UCLA's delivery of leading-edge patient care, research and education by connecting people with an integrated source of knowledge. [Learn more >>](#)

The foundation of the CareConnect Program is Epic's comprehensive clinical software suite with integrated revenue and business systems. Epic's "one patient, one record" approach improves care for patients in both hospitals and physician groups by simplifying and streamlining the important patient-facing elements of care delivery.

## What's the timeline?

This year, UCLA's CareConnect program team will focus on the implementation strategy as well as designing and building the system. Training and support, along with multi-phased implementations across all of UCLA Health System, will be our focus throughout 2012 – 2013.

## What you can do now

To get started, visit our [CareConnect program website](#). It serves as a communication hub for everyone in the UCLA Health System.

### SOME OF THE KEY FEATURES INCLUDE:

- A CareConnect Demo, where you can see a sample of some common functions
- Easy-to-follow instructions for accessing eLearnings
- CareConnect news and updates
- Testimonials and tips from UCLA professionals who have previously used the Epic system

## Questions?

Email us at [careconnect@mednet.ucla.edu](mailto:careconnect@mednet.ucla.edu)

Or, visit the CareConnect Program Website

Note: This email is the first in a series of periodic updates—to keep everyone in the UCLA Health System informed about CareConnect.
